University of Louisville Medical School
University of Tennessee College of Medicine
University of Virginia School of Medicine
Vanderbilt University School of Nursing
West Virginia School of Osteopathic Medicine

MARYVILLE
COLLEGE
IN THE GREAT SMOKY MOUNTAINS

Will Maryville College prepare me for Medical School?

The Maryville College Pre-Med program will provide you with the skill set, knowledge, confidence and character you will need to be successful in a variety of medical or medically-related fields. Because of our rigorous coursework, undergraduate research requirement, sophisticated lab assignments and opportunities for prestigious internships, you can obtain outstanding placement in medical programs. Letters of recommendation – written by faculty members who have gotten to know you personally throughout your academic career – also will help strengthen your medical school applications.

MEET A CURRENT SCOT

Hailey Cartt

Hometown: Louisville, Tenn.

The professional responsibilities of a physician are demanding, but Hailey is getting plenty of practice at MC: She's a junior Biochemistry major with a minor in Health and Wellness Promotion; she's a McGill Fellow and a Scots Science Scholar; and she's a member of the Maryville College women's soccer team. In addition, she's repeatedly made the Dean's List and was awarded the Outstanding Performance in General Chemistry honor at the College's annual

Academic Achievement Awards ceremony.

"After Maryville College, I plan on attending medical school to become a sports medicine physician because of my passion for both science and athletics," she said. "The Pre-Med program at Maryville College is setting me up for success in the future by providing me with an in-depth knowledge in my science courses, as well as a well-rounded liberal arts education that I can apply to all aspects of my life."

MEET A RECENT GRAD

Casey Gentile '17

Currently: OB/GYN resident at Tripler Army Medical Center, Oahu, Hawaii

Casey majored in Biology at MC and, following graduation, spent one year employed as the College's laboratory assistant. Enlisting in the Army and approved for the Health Professions Scholarship Program, she completed her medical degree in allopathic medicine at Florida State University College of Medicine and has begun her residency in OB/GYN at Tripler Army Medical Center in Oahu, Hawaii.

"My time at MC prepared me immensely for medical school," she said. "The supportive faculty and staff, the rigorous curriculum and a wide variety of extracurricular activities allowed me to perfect skills such as time management and leadership and exposed me to concepts that are essential in my schooling. My favorite classes that have been especially helpful were Animal Physiology and Cell and Tissue Biology."
