University of Kentucky College of Medicine
University of Tennessee: Colleges of Dentistry,
Medicine and Pharmacy
University of Virginia School of Medicine
West Virginia University School of Medicine

Will Maryville College prepare me for Dental School?

Maryville College students have stellar placement into dental schools due to the rigorous academic program and the emphasis on undergraduate research. During their tenure at MC, students are advised to work at a dentist's office. This hands-on experience combined with the thorough academic coursework and undergraduate research provides Maryville College students ideal preparation for dental school. Letters of recommendation – written by faculty members who have gotten to know students personally throughout their academic career – also help strengthen dental school applications.

MEET A RECENT GRAD

Caleb Campbell '19

Currently: Dentist at Robison and Campbell Family
Dentistry in Dalton, Georgia

Caleb, originally from Chatsworth, Georgia, was drawn to Maryville College because he knew it would prepare him for the rigor of dental school with its well-established biology curriculum. He had hands-on learning experiences in histology, anatomy, immunology and microbiology. "The Maryville College Senior Study program also allowed me to work with real human tooth samples and report findings on my own personal research," he said.

In 2024, Caleb earned his DMD degree from Temple University's Kornberg School of Dentistry, graduating summa cum laude. While in dental school, he participated in the Honors of Endodontics and Honors in Oral Surgery programs and was inducted into the Omicron Kappa Upsilon National Dental Society. "The faculty, peers and environment at MC all played a vital role in preparing me for my career," he said.
